ASSISTED REPRODUCTION INSURANCE PROGRAM®

WHY DO YOU NEED THE ASSISTED REPRODUCTION INSURANCE PROGRAM®?

IVF PROCEDURES & COMPLICATIONS

WHY DO PEOPLE BUY THE ASSISTED REPRODUCTION INSURANCE PROGRAM®?

PAYING CLAIMS DURING YOUR FERTILITY TREATMENT CAN BE DIFFICULT & FRUSTRATING TO MANAGE

IVF costs in the United States are higher than any other country in the world. Assisted Reproduction Technology (ART) procedures are mostly specialized and not a covered benefit within your major medical insurance policy after the infertility diagnosis. Therefore your insurance cover may not apply to IVF treatments, medical or ancillary claims.

One in 100 U.S. babies are conceived every year by assisted reproductive procedures. One in 10 U.S. women of reproductive age has consulted a doctor for infertility issues. IVF is dramatically increasing. In fact, 7% of women trying to have a baby fail to conceive after 12 months of unprotected intercourse. These staggering numbers inevitably increase the cost of IVF pregnancies, preterm labor and neonatal intensive care unit insurance claims.

The thought of dealing with medical expenses arising out of in-clinic services and surgical procedures and the IVF treatment is daunting to the fertility patient. This program helps by contracting directly with the IVF Clinic to guarantee out of pocket costs and provide insurance when there is none and allows our clients the ability to concentrate on what matters most, creating their family.

All claims will be managed through your Assisted Reproduction Insurance Program® Fund. You must stay within the IVF clinic participating program provider network. You should never pay insurance claims directly.
